

REPUBLIC OF THE PHILIPPINES
NATIONAL MUSEUM OF THE PHILIPPINES

Office of the Director-General

PAMANA: Support Ticketing System

U S E R G U I D E

Staff (Client)

Document	User Guide — Support Ticketing System · NMP-STIS-UG-002
System	National Museum of the Philippines Support Ticketing System (STS)
Modules covered	Introduction, sign-in, dashboard, request flow, review queues, submission, feedback, messages, and account settings
Version	1.0
Date issued	October 2026
Prepared by	
Audience	Staff users of the Client portal
Classification	Internal – For Agency Use

Note. PAMANA is used only as the source of employee sign-in and requestor profile autofill (name, email, division or section, and designation). The product name of this application is Support Ticketing System. Menus use Submit Request. Published forms may cover any request type that Admin designs in the Form Builder.

Contents of This Guide

1. Introduction
 - 1.1 Overview
2. General Information
 - 2.1 Objectives
 - 2.2 System users and their descriptions
 - 2.3 System features
3. Getting Started
 - 3.1 Log-in / Sign in
 - 3.2 Where Staff lands after sign-in
 - 3.3 Dashboard
 - 3.4 System navigation

 - 3.6 Assigned to me
 - 3.7 Messages

3.8 For Review queues

3.9 Submit Request

3.10 My Requests

3.11 Service Feedback

3.12 Settings, MFA, notifications, and logout

A. Overview

The Support Ticketing System (STS) is the museum's platform for staff support and service requests. Staff use the Client portal to submit a request on any form that Records has published, to review a request when they are the named officer, and to close the request after the service is done.

This guide is for the Staff (Client) role. It follows the path a staff member actually takes: sign in, check Assigned to me, submit or review a request, watch My Requests, complete feedback, then close or reopen. It also covers Messages, the notification bell, Settings, and MFA.

A Staff account cannot build forms, publish forms, assign roles, or open the Admin or Records portals. Those tasks belong to Admin, Record Admin, and Super Admin.

Note. Screen names in this guide match the live system: sidebar labels, page titles, and buttons. Where a queue is empty, the signed-in person is not the current reviewer for any request.

B. Objectives

The Support Ticketing System gives the National Museum of the Philippines one place to create, review, publish, submit, approve, assign, monitor, and close staff support requests. It is for museum staff across offices, sections, and divisions.

The system keeps requestor details consistent through PAMANA autofill, shows each person only the work that belongs to their role, and keeps an activity record of significant actions.

C. User's Role, Access, and Permission

Access is determined by the role stored on the employee account. After Sign In, the system opens the home page for that role. A person sees only the menus allowed for the portal they are in.

i. Super Admin

Super Admin has the highest level of access. This role opens the Super Admin portal, manages Users, Roles, and Permissions, reviews system-wide dashboards, reports, activity logs, error monitoring, and system notifications, and can open the Admin, Records, and Staff/Client portals with the same account. While inside Admin, Records, or Staff, a SWITCH PORTAL group appears in the sidebar so the user can move without signing out.

ii. Admin

Admin (Section Head — ODG Section and Regional Component Museum; Division Head — all except ODG) creates request forms in Form Builder, manages My Forms, approves or rejects requests, assigns

personnel from the form creator's division, and uses Approvals, Request Management, Assigned to me, Reports, and Messages. Admin may also submit a personal request.

iii. Record Admin

Record Admin reviews forms that Admin has submitted, then chooses Approve & publish or Disapprove with remarks. Published forms become available to Staff. The Records menus are Dashboard, Pending Forms, Published Forms, and Activity Logs.

iv. Staff (Client)

Staff is the general museum employee. After Sign In, a Staff account opens Assigned to me, not the Dashboard. Staff submits requests from any published form, tracks those requests under My Requests, marks the service complete, completes the Client Satisfaction Survey, then closes or reopens the request. When the form names them as Recommending Officer, Immediate Supervisor, or Action Officer, the matching For Review queue shows the request. Assigned to me lists requests an Admin assigned to them. Those are not the same as requests they submitted.

D. System Features

- **Form Builder.** Admin creates a general request form in a six-step wizard: General, Fields, Print Template, Client Request Approval, Workflow, and Supporting Doc.
- **Form review and publishing.** Record Admin reviews a pending form and publishes it or disapproves it with remarks. Only a published form can be selected by Staff.
- **Request submission.** Staff, and Admin or Super Admin acting as a requestor, select a published form. Requestor details auto-fill from PAMANA when the username matches an employee record.
- **Client review.** If the form requires it, the request stops at For Review (Recommending) and then For Review (Supervisor) before it reaches Action Officers.
- **Action Officer workflow.** Configured officers approve in sequence. The last officer forwards the request for task assignment.
- **Personnel assignment.** After the Action Officer steps are finished, the request manager assigns the request once, to active personnel in that admin's section. Assignment sets the status to In Progress.
- **Service completion and feedback.** The requestor marks the service complete, opens the Client Satisfaction Survey, confirms with I've submitted feedback, then chooses Close ticket or Reopen request.
- **Messaging.** Admin and Staff portals include Messages, including poke and ticket-linked Request messages.
- **Notifications.** The bell in the header lists updates for the signed-in portal. Super Admin also has a System Notifications page for queues across portals.
- **Role-based access.** Users, Roles, and Permissions are maintained in the Super Admin portal.
- **Audit and errors.** Activity Logs record significant actions. Error Monitoring records server, browser, and console failures.
- **Account.** Settings updates display name, division or office, and designation. The sign-in password is the PAMANA password and is not changed inside STS. MFA can be turned on from Set up MFA.

E. Getting Started

I. Log-in / Sign in

The Log-in page is the single entry point for every role. The system reads the account role and opens the correct portal.

1. Open the system. Use a supported web browser and go to the official address, for example <http://202.90.136.222:5173/login>.

2. Enter your credentials.

a. Username. Type the museum username assigned to you.

b. Password. Type your PAMANA password.

3. Use the helpers only if you need them.

a. Show password. Select the eye icon to check the password before you submit it.

b. Remember me. Tick this only on a computer you alone use. It stores the username on that browser.

c. Forgot password? This does not send a reset email. The page tells you to contact your system administrator. Change the password in PAMANA, then sign in here with the new password.

4. Sign In. Select Sign In. If multi-factor authentication is enabled on the account, an Authentication code field appears. Enter the 6-digit code from the authenticator app, or a one-time recovery code, then select Sign In again.

5. Land on the correct home page. A Staff account opens Assigned to me. Super Admin opens the Super Admin Dashboard. Admin opens the Admin Dashboard. Record Admin opens the Records Dashboard.

***Note.** If the page says the API server is not running, the application service is down. Do not keep retrying the password. Report it to ICT.*

II. Where Staff lands after sign-in

Staff does not open on the Dashboard. The first page is Assigned to me. That page lists requests an Admin assigned to you so you can do the work. It is not the list of requests you submitted. Your own requests are under My Requests.

1. Read the page title. Assigned to me. The description states that these are requests an admin assigned to you.

2. Read the table. Columns are Ticket, Client, Status, and Action. The ticket number opens the request. The form title sits under the ticket number. Client is the person who submitted it.

3. If the table is empty, no request is currently assigned to you. That is a normal state. Submit your own request from Submit Request when you need a service.

III. Dashboard

Open MAIN > Dashboard when you want a summary of requests you submitted. The welcome line uses your first name and shows today's date and your division.

1. New request. The button at the top right opens Submit Request.

2. Read the alert, if one is showing.

- a. You have assigned requests. Select Open Assigned to me.
 - b. Submit feedback. One or more requests were marked complete and still need the survey. Select Open request or View all.
 - c. Mark service complete. One or more of your requests can be marked done. Select Open my requests.
 - d. Rejected. Open My Requests, read the remarks, and submit again if the work is still needed.
- 3. Read the three counts.** Active requests, Pending approval, and Completed. Each card opens My Requests.
- 4. Recent requests.** Shows up to six of your latest requests with ticket number, assigned personnel or Unassigned, date, and status. View opens the request. Feedback opens a request that still needs the survey.

IV. System navigation

The left sidebar is grouped. On a small screen, open the menu from the header, then choose the same items.

MAIN

- Dashboard — summary of requests you submitted.
- Assigned to me — requests assigned to you. A count appears when there are items.
- Messages — conversations, poke, and request messages.

REQUESTS

- For Review (Recommending) — endorse requests when you are the Recommending Officer.
- For Review (Supervisor) — review endorsed requests when you are the Immediate Supervisor.
- For Review (Action Officer) — approve the current Action Officer step when it is your turn.
- Submit Request — start a new request on a published form.
- My Requests — requests you submitted, and the place to complete, give feedback, close, or reopen.
- Service Feedback — the same feedback step, collected on one page.

Bottom of the sidebar

- Settings — display name, division or office, and designation. Email and Role cannot be edited.
- Set up MFA — optional authenticator code at sign-in.
- Logout — ends the session and returns to the log-in page.

The bell at the top of the page lists updates on your requests, assignments, messages, and pokes. View all opens My Requests. If there is nothing new, the list says No updates on your requests.

V. How a request moves

Every published form uses the same path. Extra review steps appear only when Admin turned them on for that form. You do not choose the path at submit time.

Order	What happens	Status you may see	Who acts
1	Staff submits a published form.	For Client Approval, or For Process Owner	Requestor
2	Recommending Officer endorses, if the form requires it.	For Client Approval	Named recommending officer
3	Immediate Supervisor reviews, if the form requires it and that person is different.	For Client Approval	Named supervisor
4	Action Officers approve in the order set on the form.	For Process Owner	Current Action Officer
5	The last officer's step is finished and the request is ready to assign.	For Process Owner	Request Management
6	The request manager assigns personnel in their section. Assignment can be done once.	In Progress	Request manager
7	Requestor marks the service complete.	Resolved	Requestor
8	Requestor finishes the survey and confirms feedback.	Resolved	Requestor
9	Requestor closes the ticket, or reopens it.	Closed, or Reopened	Requestor

Other labels you may see:

- Pending Approval — an older waiting status. A new submission starts as For Client Approval or For Process Owner, not Pending Approval.
- Open — a status an admin can set while work is underway. You may mark the service complete from Open.
- Pending — an admin has paused the work. You may still mark the service complete when the work is actually finished.
- Rejected — a reviewer declined the request. A reason is required. Read it on the request, then submit a new request if needed.

Note. If the form requires a Recommending Officer or Immediate Supervisor and PAMANA has no matching officer, the request can be approved by an admin instead. You will still see it under My Requests. You do not move it forward yourself unless your name is the current reviewer.

VI. Assigned to me

1. Open MAIN > Assigned to me.

2. Find the ticket. Use the ticket number, form title, client name, and status.

3. Open the request. Select the ticket number. Use the Action column to view the submitted form file when it is available.

4. Do the assigned work outside the status buttons. Mark service complete, feedback, and Close ticket belong to the person who submitted the request, on My Requests. If you were only assigned to do the work, coordinate with that requestor when the service is finished.

VII. Messages

1. Open MAIN > Messages.

- 2. Start or open a conversation.** Search by name, email, or division. Staff can reach Admins and other clients who appear in the list.
- 3. Poke.** Use Poke when you need to get a person's attention without a long message.
- 4. Request messages.** On an open request under My Requests, select Request messages. That conversation stays tied to the ticket. The button is hidden after the request is Closed.

VIII. For Review queues

These three pages are for staff who were named on the form's approval setup, or who PAMANA lists as the Recommending Officer or Immediate Supervisor. If you are not that person, the page stays empty. Do not treat an empty queue as an error.

For Review (Recommending)

Page title: For Review — Recommending Officer. Endorse requests from your section before they go to the Immediate Supervisor.

- 1. Open REQUESTS > For Review (Recommending).**
- 2. Open the form file if you need to read the submission.**
- 3. Approve.** The request moves to the Immediate Supervisor when the form requires a supervisor and that person is someone else. The confirmation says Endorsed for supervisor review.
- 4. Reject.** Select Reject, type a Reason for rejection, then Confirm reject. Cancel leaves the request in the queue. The requestor sees the reason.

For Review (Supervisor)

Page title: For Review — Immediate Supervisor. Review endorsed requests before they go to Action Officers.

- 1. Open REQUESTS > For Review (Supervisor).**
- 2. Approve.** The confirmation says Approved for Action Officers. The request leaves this queue and becomes For Process Owner.
- 3. Reject.** A reason is required, the same way as the recommending step.

For Review (Action Officer)

Page title: For Review — Action Officer. Approve requests that have finished recommending and supervisor review. Officers act in sequence. After the last approval, the request is ready for task assignment.

- 1. Open REQUESTS > For Review (Action Officer).**
- 2. Act only on the row that is waiting for you.** A later officer does not see the request as theirs until the earlier officer has approved.
- 3. Approve or Reject.** Reject still requires a reason. Use Refresh if you expect a new item and the list has not changed.

IX. Submit Request

- 1. Open REQUESTS > Submit Request.** You can also use New request on the Dashboard, or New request on My Requests.
- 2. Choose a form.** The list shows published forms only. If it says No forms available, Records has not published a form yet. You cannot submit.
- 3. Wait for requestor details.** The page says Loading requestor details while it reads PAMANA, then shows Your requestor details (auto-filled). Sign in with your museum username. If no PAMANA employee record matches the login, the submit is blocked.
- 4. Complete the remaining fields.** Fill every required field. Answers you have already typed are kept if you switch forms, including the PAMANA profile fields.
- 5. Review the TA form.** Use the preview before you submit so you can see where your answers sit on the printable layout.
- 6. Submit request.** The new ticket appears only in your My Requests list. You return to that list after a successful submit.

***Note.** Back to my requests leaves the form without submitting. A file attached to a form field must follow the file type and size the field allows. Printable templates and supporting PDFs used by Admin are limited to 25 MB.*

X. My Requests

This is the home of every request you submitted. The page title is My Requests. New request starts another submission.

- 1. Open REQUESTS > My Requests.**
- 2. Select a ticket** to open its number, form title, status, answers, and assigned personnel.
- 3. Read Assigned personnel.** Before assignment, the panel says an admin will assign personnel after the request is approved. During In Progress, it names the people handling the work.
- 4. Mark service complete** when the status is Open, In Progress, Pending, or Reopened and the work is finished. The button is Mark service complete. The status becomes Resolved, and the feedback survey opens in a new tab when a survey link is configured.
- 5. Complete the official survey.** Select Open Client Satisfaction Survey. The ticket number is included in the link. Then add optional Notes for admin and select I've submitted feedback.
- 6. Close or reopen.** After feedback is recorded, Close request offers Close ticket and Reopen request. Close ticket ends the request. Reopen request sends it back for further work.
- 7. Use Request messages** while the request is not Closed, if you need to write to the people on that ticket.

XI. Service Feedback

REQUESTS > Service Feedback collects every request of yours that is Resolved and still needs feedback. Each card shows the ticket number, form title, and the same two steps: open the Client Satisfaction Survey, then I've submitted feedback. My requests on this page returns you to the full list. A count on the menu means at least one request is waiting.

If the page says the feedback link is not configured, stop and tell your administrator. Do not invent a survey result. The survey address is set for the whole system.

XII. Settings, MFA, notifications, and logout

Settings

- 1. Open Settings at the bottom of the sidebar.**
- 2. Account.** Email and Role are shown and cannot be changed here. Role for this portal reads Staff.
- 3. Update Display name, Division / office, and Designation.** Name and division are required.
- 4. Save profile.** The header and activity logs use the saved name.
- 5. Password.** The panel states that this portal signs you in with your PAMANA account and cannot change that password. Change it in PAMANA, then use the new password at Sign In.

Set up MFA

- 1. Select Set up MFA.**
- 2. Enter your current password and select Set up MFA.**
- 3. Scan the QR code** with Google Authenticator or Microsoft Authenticator, or type the setup key as a time-based account.
- 4. Save the recovery codes.** They are shown once. Each code works one time if you lose the device.
- 5. Enter the 6-digit code from the app and select Confirm and enable.**
- 6. Later,** open Set up MFA again to create new recovery codes or to Disable MFA. Both actions ask for your password. New codes replace the old ones.

Notifications and logout

Use the bell for items that need you. Select Logout when you leave a shared computer. Logout ends the Staff session and returns to the log-in page.

Appendix A. Approvals

The undersigned acknowledge that they have reviewed this User Guide and agree with the information presented. Changes to this User Guide will be coordinated with, and approved by, the undersigned or their designated representatives.
