1. Introduction

1.1 Overview

The Technical Assistance Request Form (TARF) System is a centralized platform designed to streamline the creation, review, submission, approval, assignment, and completion of technical assistance (TA) requests within the National Museum of the Philippines (NMP).

It provides administrators, records personnel, and staff with the tools needed to:

- build and publish TA forms,
- review and publish form templates,

- submit TA requests with requestor details auto-filled from PAMANA,
- approve and assign work to ICT personnel, and
- track service completion, feedback, and closure.

This manual serves as a guide for authorized employees in using the TARF System. It covers logging in, navigating each portal (Admin, Records, and Client), managing forms and requests, messaging, notifications, and account settings.

The TARF System aims to improve efficiency, accountability, and transparency in technical assistance handling by reducing manual paperwork, ensuring requestor details are accurate through PAMANA integration, and providing a clear audit trail for every request processed within the system.

This manual is intended for authorized NMP personnel responsible for operating or using the platform according to their assigned role.

2. General Information

The TARF System of the National Museum of the Philippines (NMP) aims to provide a centralized and efficient platform for monitoring, managing, and tracking technical assistance requests within the organization. The system improves request visibility, accountability, processing efficiency, and timely action by authorized personnel and offices.

2.1 Objectives

The TARF System aims to:

2.1.1 Make the creation, review, submission, approval, assignment, and closure of technical assistance requests easier and more organized.

2.1.2 Help users quickly check the status of TA forms and tickets, reduce delays, and keep a clear record of transactions.

2.1.3 Auto-fill requestor details (division, name, email, designation) from PAMANA so staff do not re-encode profile data manually.

2.1.4 Provide dashboards, notifications, messaging, and reports to help offices monitor pending and completed requests.

2.2 System Features

2.2.1 Form Builder. Authorized Admin users can create TA forms with fields, a print template, field placements, and a procedure section, then submit the form to Records for review.

2.2.2 Form Review and Publishing. Record Admin users review pending forms, approve and publish them for client use, or disapprove them with remarks for return to Admin.

2.2.3 Request Submission. Staff (Client Portal) and Admin users (My Requests / Submit TA Request) can submit technical assistance requests using published forms.

2.2.4 PAMANA Requestor Autofill. The system fills Division/Section, First Name, Middle Name, Last Name, Email Address, and Designation from PAMANA employee records linked to the signed-in museum username.

2.2.5 Request Approval. Admin users approve or reject pending client requests before assignment.

2.2.6 Personnel Assignment. Admin users assign approved tickets to ICT personnel. Assigned staff can track work under My Assignments.

2.2.7 Status Tracking. Users can monitor ticket statuses such as pending approval, approved, rejected, open, in progress, pending, resolved, closed, and reopened.

2.2.8 Service Completion and Feedback. The requestor marks service complete, submits client satisfaction feedback, then closes or reopens the request.

2.2.9 Document / Form Preview. Users can view the form template and how answers (including PAMANA fields) appear on the printable form.

2.2.10 Messaging. Admin and Client portals support chats, ticket-linked threads, pokes, and @mentions.

2.2.11 Notifications. The system notifies users of pending approvals, pending form reviews, and actionable request updates.

- 2.2.12 Role-Based Access Control (RBAC). Access is restricted according to the user's assigned role (Super Admin, Admin, Record Management, Staff).
- 2.2.13 Reports and Analytics. Admin users can view request volume, completion, and client feedback summaries.
- 2.2.14 Settings. Users can update display profile details and change their password.

2.3 System Users and Their Descriptions

- 2.3.1 Super Admin has the highest level of system access and is responsible for overall system administration, including managing roles, permissions, and other administrative functions. In the TARF portals, Super Admin maps to the Admin portal.
- 2.3.2 Admin (Section Head — ODG Section and Regional Component Museum; Division Head — All except ODG) manages Form Builder and My Forms, approves client TA requests, assigns ICT personnel, monitors Request Management and My Assignments, may submit personal TA requests, and manages RBAC Users / Roles / Permissions.
- 2.3.3 Record Management (Record Admin) is responsible for reviewing forms pending publication, approving and publishing forms for client use, or disapproving forms with remarks, and monitoring Activity Logs.
- 2.3.4 Staff (Employee / Client requester) submits technical assistance requests, tracks My Requests, marks service complete, submits feedback, closes or reopens requests, and uses Messages. Staff is the merged Staff/User role in RBAC (system name user, displayed as Staff).

3. Getting Started

3.1 Log-in / Sign In

- 3.1.1 To start using the web application, open any web browser and enter the TARF System address in the address bar (for example, <http://on-prem.x-dcb.net:5173/login>). The TARF SYSTEM log-in page will be displayed (Figure 1).
- 3.1.2 On the Welcome Back page, enter a valid Username (museum org username) or email and Password, then click Sign In.
- 3.1.3 Optional: check Remember me to keep the session preference on the device.
- 3.1.4 After successful sign-in, the system redirects the user based on role:

Role	
	Landing page
Admin / Super Admin	Admin Dashboard (<code>/admin/dashboard</code>)
Record Management	Records Dashboard (<code>/records/dashboard</code>)
Staff	Client Dashboard (<code>/client/dashboard</code>)

Note: Legacy portal login URLs (`/admin/login`, `/client/login`, `/records/login`) are deprecated.

Figure 1 – TARF System log-in page

(Insert screenshot of the Welcome Back / Sign In screen.)

3.2 Dashboard

Upon login, the user is directed to the Dashboard for their portal. The Dashboard provides an overview of key activities, counts, and shortcuts.

3.2.1 Admin Dashboard

- 3.2.1.1 Displays a personalized greeting (for example, Good day, {name}).
- 3.2.1.2 Shows a snapshot of TA forms and pending client requests.
- 3.2.1.3 Provides quick access toward Approvals, Request Management, and My Assignments.
- Figure 2 – Admin Dashboard

3.2.2 Records Dashboard

- 3.2.2.1 Displays a welcome message for the Record Admin.
- 3.2.2.2 Shows counts for pending forms and published forms.

3.2.2.3 Highlights items needing review under Pending Forms.

Figure 3 – Records Dashboard

3.2.3 Client Dashboard

3.2.3.1 Displays Welcome back, {name} and an overview of Your requests.

3.2.3.2 Provides visibility of recent request statuses and links toward Submit Request and My Requests.

Figure 4 – Client Dashboard

3.3 System Navigation

3.3.1 The left-side menu provides access to the main features of the system. The sidebar brand shows National Museum of the Philippines / TARF SYSTEM.

3.3.2 The bottom of the sidebar provides Settings and Logout.

3.3.3 The header includes the notification bell and the current page title.

3.3.4 Admin navigation

Section	Menu item	Purpose
MAIN	Dashboard	Overview
MAIN	Reports	Reports & Analytics
MAIN	Messages	Messaging
FORMS	Form Builder	Create / edit TA forms
FORMS	My Forms	Drafts, pending, published, disapproved forms
REQUESTS	Approvals	Pending client TA approvals
REQUESTS	Request Management	All client requests
REQUESTS	My Assignments	Tickets assigned to you
REQUESTS	My Requests	Your own TA submissions
REQUESTS	Submit TA Request	Submit a TA request as requestor
RBAC	Users	Assign roles to employees
RBAC	Roles	Manage roles and permissions
RBAC	Permissions	Permission catalog

3.3.5 Records navigation

Section	Menu item	Purpose
MAIN	Dashboard	Overview
FORMS	Pending Forms	Forms awaiting recommendation
FORMS	Published Forms	Live forms for clients
SYSTEM	Activity Logs	Audit trail

3.3.6 Client navigation

Section	Menu item	Purpose
MAIN	Dashboard	Overview of your requests
MAIN	Messages	Messaging
REQUESTS	Submit Request	Submit a new TA request
REQUESTS	My Requests	Track and manage your tickets
REQUESTS	Service Feedback	Pending feedback actions

Figure 5 – Sample portal navigation (sidebar)

4. Admin Portal

4.1 Form Builder

4.1.1 Open Form Builder from the FORMS section (/admin/forms).

4.1.2 Complete the wizard in order:

Step	Name	Description
1	General	Form title, reference details, and general settings
2	Fields	Define input fields for the client request
3	Print Template	Upload the printable template and place fields (including default PAMANA profile fields)
4	Procedure	Procedure / instructions content

4.1.3 Use Back and Continue to move between steps.

4.1.4 On the Print Template step, place form fields that are always available:

Field label	Variable
Division/Section	`{{prof_division}}`
First Name	`{{prof_first}}`
Middle Name	`{{prof_middle}}`
Last Name	`{{prof_last}}`
Email Address	`{{prof_email}}`
Designation	`{{prof_designation}}`

4.1.5 When ready for Records review, click Submit to Records. To keep the form, click Submit to Drafts instead.

Figure 6 – Form Builder wizard

4.2 My Forms

4.2.1 Open My Forms (/admin/my-forms) to view forms you created.

4.2.2 Use + New Form / Create Form to start a new form.

4.2.3 For a draft, use Send to Records when ready for review.

4.2.4 For a disapproved form, review remarks, edit in Form Builder, or delete.

4.2.5 For other statuses, use View to open the form details.

Figure 7 – My Forms

4.3 Approvals

4.3.1 Open Approvals (/admin/approvals) to see client TA requests.

4.3.2 Review the request details and form file (for example, View file).

4.3.3 Click Approve / Approve request to accept the request, or Reject.

4.3.4 When rejecting, enter a reason and confirm with Confirm reject.

4.3.5 After approval, assign ICT personnel using Assign personnel.

The ticket moves to In Progress when assignment is completed as assigned.

Figure 8 – Approvals

4.4 Request Management

4.4.1 Open Request Management (/admin/requests) to view all client requests.

4.4.2 Typical list columns include Ticket, Client, Division, Status, and Assigned.

4.4.3 Open a ticket to view full details, update status where allowed, assign personnel, and open Request messages.

Figure 9 – Request Management

4.5 My Assignments

4.5.1 Open My Assignments (/admin/assigned) to see requests assigned to you as ICT personnel.

4.5.2 Use this list to track work until the client marks the service complete and closes the request.

Figure 10 – My Assignments

4.6 My Requests / Submit TA Request

Admin users may also act as requestors.

4.6.1 Open Submit TA Request (/admin/submit-request) to submit a personal TA request using a published form (same flow as Client Submit Request, including PAMANA autofill).

4.6.2 Open My Requests (/admin/my-requests) to track your own submissions.

4.6.3 From a ticket detail page you may Mark service complete, submit feedback, Close ticket, or Reopen request, as applicable.

Figure 11 – Admin My Requests

4.7 Reports

4.7.1 Open Reports (/admin/reports) titled Reports & Analytics.

4.7.2 Review volume, completion, and client feedback summaries to monitor operational performance.

Figure 12 – Reports & Analytics

4.8 RBAC (Users, Roles, Permissions)

4.8.1 Open Users (/admin/rbac/users) to search employees, filter by role/access, and Assign or Manage roles.

4.8.2 Use pagination (Prev / Next) to move through employee pages.

4.8.3 Open Roles to review system roles (Super Admin, Admin, Record Management, Staff) and manage permissions. System roles cannot be deleted.

4.8.4 Open Permissions to browse the capability catalog by category.

Figure 13 – RBAC Users

5. Records Portal

5.1 Pending Forms

5.1.1 Open Pending Forms (/records/pending) to see forms with status Pending Review.

5.1.2 Use Search to locate a form by title or reference when available.

5.1.3 Open a form to review the Form template (view-only).

5.1.4 Under Recommendation, select:

- Approve & publish, or
- Disapprove (provide remarks as required).

5.1.5 Click Submit recommendation.

5.1.6 Approved forms become Published and appear under Published Forms for clients. Disapproved forms return to Admin with remarks.

Figure 14 – Pending Forms / Recommendation

5.2 Published Forms

5.2.1 Open Published Forms (/records/published) to browse live TA forms available for client submission.

Figure 15 – Published Forms

5.3 Activity Logs

5.3.1 Open Activity Logs (/records/activity) to review the audit trail of records-related actions.

Figure 16 – Activity Logs

Note: Messaging is not available in the Records portal navigation. Records focuses on form review and publishing.

6. Client Portal (Staff)

6.1 Submit Request

- 6.1.1 Open Submit Request (/client/submit).
- 6.1.2 Under Published form, select the TA form you need.
- 6.1.3 The system loads your requestor profile from PAMANA when your museum username is linked. You may see status messages such as loading profile, filled-from PAMANA, or no PAMANA record found.
- 6.1.4 Complete any remaining form fields required for the request.
- 6.1.5 Click View form file to preview how answers appear on the printable template.
- 6.1.6 Click Submit request. The ticket is created with status pending approval for Admin review.

Figure 17 – Submit Request

6.2 My Requests

- 6.2.1 Open My Requests (/client/requests) to list tickets linked to your account.
- 6.2.2 Typical columns: Ticket, Form, Status, Assigned to, Submitted, Action.
- 6.2.3 Click View details (or the actionable link shown) to open the ticket.
- 6.2.4 When ICT work is finished and the status allows it, click Mark service complete.
- 6.2.5 Complete the Client Satisfaction Survey / feedback step (I've submitted feedback or equivalent confirmation in the panel).
- 6.2.6 When ready, click Close ticket. To continue work, click Reopen request.

Figure 18 – My Requests / ticket detail

6.3 Service Feedback

- 6.3.1 Open Service Feedback (/client/feedback) to see requests that still need feedback action.
- 6.3.2 Follow the on-screen survey / confirmation steps for each pending item.

Figure 19 – Service Feedback

7. Shared Features

7.1 Messages

- 7.1.1 Available in Admin and Client portals under Messages.
- 7.1.2 Use Chats to open existing conversations.
- 7.1.3 Click New to open New message, select recipients, compose, and Send.
- 7.1.4 Use Poke where available to nudge participants.
- 7.1.5 From a ticket detail page, open Request messages to join or continue the ticket-linked thread.

Figure 20 – Messages

7.2 Notifications

- 7.2.1 Click the notification bell in the header.
- 7.2.2 Typical destinations for “View all”:

Portal	Notification focus	View all goes to
Admin	Pending client approvals	Approvals
Records	Pending forms	Pending Forms
Client	Actionable request updates	My Requests

Figure 21 – Notifications

7.3 Settings

7.3.1 Open Settings from the sidebar footer.

7.3.2 Under Account, update Display name, Division / office, and Designation as allowed, then Save profile. Email and Role are shown for reference according to policy.

7.3.3 Under Password, enter the current and new password, then Change password.

Figure 22 – Settings

8. Status Reference

8.1 Form statuses

Status	Meaning
Draft	Saved by Admin; not yet submitted to Records
Pending Review	Submitted to Records; awaiting recommendation
Published	Approved by Records; available for client submission
Disapproved	Returned to Admin with remarks

Status

pending approval	Awaiting Admin approve/reject
approved	Approved; ready for assignment / processing
rejected	Rejected with reason
open	Active / assignable
in progress	ICT assigned / work ongoing
pending	Holding status set by Admin
resolved	Requestor marked service complete; feedback/close next
closed	Closed after feedback
reopened	Reopened by requestor for further action

8.2 Ticket statuses

Meaning
Awaiting Admin approve/reject
Approved; ready for assignment / processing
Rejected with reason
Active / assignable
ICT assigned / work ongoing
Holding status set by Admin
Requestor marked service complete; feedback/close next
Closed after feedback
Reopened by requestor for further action

8.3 End-to-end workflow summary

Phase 1 — Form publishing

1. Admin builds form in Form Builder.
2. Admin clicks Submit to Records (or Send to Records / Resubmit)
3. Record Admin reviews and Approve & publish or Disapprove.

Phase 2 — Technical assistance request

1. Staff (or Admin as requestor) submits via Submit Request.
2. Admin approves (or rejects) on Approvals.
3. Admin assigns ICT personnel.
4. ICT performs the work (My Assignments).
5. Requestor marks service complete !' feedback !' Close ticket (or

9. Frequently Asked Questions

9.1 Why are my Division / Name / Email empty on the form preview
Sign in with your museum username so PAMANA can match your e
record is found, profile fields cannot auto-fill.

9.2 Do client submissions go to Records?

No. Records reviews forms for publishing. Client TA tickets go to Ad

9.3 Can Admin submit a TA request?

Yes. Use Submit TA Request and track it under My Requests.

9.4 Why is Messages missing in Records?

Messaging is available in Admin and Client portals only.

9.5 What are the current system roles?

Super Admin, Admin (Section Head / Division Head scope), Record Management, and Staff.

Appendix A — Portal URLs (typical)

Portal	Path
Login	`/login`
Admin	`/admin/dashboard`
Records	`/records/dashboard`
Client	`/client/dashboard`

Exact hostnames depend on deployment (for example, <http://on-premise>).

Appendix B — PAMANA profile fields

Placement label	Variable	Typical PAMANA source
Division/Section	`{{prof_division}}`	Section
First Name	`{{prof_first}}`	First name
Middle Name	`{{prof_middle}}`	Middle name / initial
Last Name	`{{prof_last}}`	Last name
Email Address	`{{prof_email}}`	Secondary email or email
Designation	`{{prof_designation}}`	Position

Appendix C — Document control

Item	Value
Document title	PAMANA: TARF Employee User Manual
Version	1.0
Date	September 2026
Based on	NMP Document Tracking System (DTS) Employee Manual structure
System	National Museum TARF Support Ticketing System
